SBM: new project for celebration of the 80th anniversary of the August revolution and National Day of the Socialist Republic of Vietnam

SBM: new project for celebration of the 80th anniversary of the August revolution and National Day of the Socialist Republic of Vietnam

As a practical contribution to the celebration of the 80th anniversary of the August revolution

and National Day of the Socialist Republic of Vietnam, SBM launched an emulation movement and successfully completed the design and production of 5 generator sets with a total capacity 4600KVA, supplying and installing them for the North-South railway system - a key national project.

The backup power supply system comprises multiple SBMPOWER generators operating independently, incorporating manufacturing technology from Baudouin and Leroy-Somer (France). Designed and manufactured by SBM, the system has been tested to ensure high reliability and complies with the National Standard TCVN 9729:2013.”

All equipment was delivered and installed at the construction site before September 2, 2025, as a small achievement of the SBM team, sharing in the nationwide joy of celebrating 80 years of our country's independence and freedom!
